FULL HEIGHT ADA GATE

Design and Purpose: This full height ADA compliant gate is designed with security and simplicity in mind. Ideal to place next to one of our Full Height Turnstiles with hardware to attach, It can be configured a number of ways. A door strike with panic bar, magnetic lock with push to exit button, or a typical door handle with a key and mortise lock. With tough welded steel or stainless-steel construction, a #9 mesh to resist tampering, and a heavy duty fully adjustable hydraulic self-closing hinge, this gate is sure to stand the test of time.

Options:

- 36" or 48" passage (custom upon request)
- steel with powder coating or galvanized - powder coating over galvanized - and stainless steel
- #9 mesh to resist tampering or vertical welded tubes for filler inside gate, glass with glass clamps is an optional filler for stainless ADA gate

Configurations:

- Door handle with strike
- Push to exit panic bar with strike
- Maglock with push to exit button
- Key and mortise lock with handle

Custom:

We also offer custom partitions for in

This 36" ADA gate is powder coated silver to match aluminum and features an electric strike with an adjustable hydraulic self closing hinge. (turnstile and custom partition sold separately.
